

# AUTISTIC NEUROLOGY AND BEHAVIOR

Autistic people use behavior just like people who are not autistic.

## 1 UNDERSTAND THE UNDERLYING AUTISM NEUROLOGY

An autistic neurology is a completely different operating system than a typical neurology.

## 2 FIND SOLUTION BASED ON AUTISM NEUROLOGY

Join with your students finding viable alternatives that work in the classroom environment.

## Strive to understand it.

Besides being kind and being the right thing to do, it is far more expedient to support autistic neurology than it is to assume negative character and ill intentions about your student with autism when he is struggling.

JUDY ENDOW, MSW
